Kurventechnik-Kurs 1
vom SA, 5. Juli 2025

The course is available from FR/SA, 4/5 July 2025

There are still 3 places available!

E-mail to urs.tobler@datacomm.ch

Based on a survey on 19 June, I was able to book 4 definite registrations and confirm the course. Two other participants are unable to attend due to the dates, two others are currently struggling with their health (get well soon!)

Unfortunately, an email arrived shortly afterwards from an intended participant: He was driving (much) too fast and now his driving licence and motorbike have been confiscated. He hadn't ridden the bike for 24 hours, he had picked up his new bike from the dealer and wanted to know how the thing was running ... Obviously this was not a good idea, as he could have done this officially in Germany on the open motorway.

Well, it remains the same: the course will take place, at the moment there are only 3 participants, all English-speaking - maybe someone else can warm up to take part in this inexpensive and very instructive course, possibly as a re-petent. The theory will probably take place on Friday evening in Oerlikon. Practical part with start at 07.10 am in Hegnau at the Landi petrol station (exit Hegnau, 1st roundabout on the right) or directly at the Rest. Brückenwaage in Dussnang TG on the way to Fischingen, where we will spend the day in the traditional area ... Guarantee: bends à gogo, tiredness in the evening pre-programmed.
